

ALPHA™ MNS PoE SERIES: 4000 RGB

Emergency Notification Solutions from Adaptive

Adaptive Display Solutions electronic message centers should be a component of any multi-modal emergency notification plan. Now Available in True PoE per IEEE 802.3.

Having your campus-wide alert systems work together by incorporating our products helps to ensure that in a crisis, everyone receives emergency notification – including areas where noise levels are high, acoustics are poor, or mobile phones are not permitted or accessible.

Adaptive is a leading provider to the rapidly growing MNS market. We display critical alerts and messages via highly visible, full-color LED displays that are rated for both indoor and semi-outdoor applications listed to UL1638 Standard for Safety to Visual Signaling Appliances.

Adaptive models are tested to verify compliance with FCC "Rules and Regulations" Part 15, Subpart B, Sections 15.107b and 15.109b for Unintentional Radiators.

Manufacturing quality LED display solutions in the United States for over 35 years.
